M A D E W I T H S O U L

From perfecting the rotary engine and winning the Le Mans race the first time we entered it, to breaking the world record for the most-sold two-seater convertible in history, we are driven forward by the desire to defy convention. We believe that if you can imagine it, we can make it happen.

This desire is the fuel behind everything we create and achieve and now, it has given us **SKYACTIV TECHNOLOGY**, '**KODO – Soul of Motion**' design and countless other successes that were once considered impossible feats. These pages show how striving to do what others cannot is not only rewarding but also integral to creating innovative, beautiful cars.

MAZDA CX-3

THE

MAZDA CX-3

Introducing the Mazda CX-3, the first Crossover that combines the stylish design of a hatchback with the versatility of an SUV. Based on the Japanese sense of beauty, we make the car feel like it's alive. Built with city driving in mind yet capable of taking on country roads, the Mazda CX-3 is equipped with the latest **SKYACTIV TECHNOLOGY**, giving it natural agility coupled with outstanding fuel efficiency. It's instantly clear that this Crossover is out of the ordinary; a creation of '**KODO – Soul of Motion**' design. KODO is inspired by the instant when energy bursts into motion. It's the powerful grace of an animal pouncing, or a human leaping into action. Balancing athletic presence, streamlined simplicity and elegant detail, the Mazda CX-3 brings rare imagination to the Crossover.

DRIVER

CENTRIC

STAY CONNECTED
MZD Connect presents a world of online infotainment and content on a 8-inch screen. MZD Connect is standard on Dynamic, Individual and Hikari models.

ENHANCED CONTROL
The multi-function commander control keeps your infotainment easily at hand, helping you to concentrate on driving while making selections. Standard on Dynamic, Individual and Hikari models.

Staying connected in the Mazda CX-3 is simple when using the MZD Connect system with commander. Controls are where you naturally expect them to be. The MZD Connect system responds to a wider variety of needs by greatly improving the convenience of functions that require Bluetooth® connectivity, such as hands-free phone operation, reception of short text messages and Internet radio. Just as thoughtful is the multi-function commander, which allows complete control while on the move with minimum distraction. MZD Connect is standard on Dynamic, Individual and Hikari models.

COCKPIT

EFFICIENCY TO GET EXCITED BY

Mazda is committed to reducing the environmental impact of our vehicles, yet we'd never want to compromise the driving enjoyment that's core to our DNA. In answering this challenge, we arrived at a breakthrough – SKYACTIV TECHNOLOGY. In every way imaginable, the Mazda CX-3 has been created to unlock efficiency and unleash performance potential. i-Stop cleverly saves fuel by turning off the engine when you come to a stop, positioning it perfectly for a quick restart. i-Stop is standard on Active Auto, Dynamic, Individual and Hikari models.

SKYACTIV-G 2.0L PETROL ENGINE

A new-generation internal combustion engine generates more performance from less fuel thanks to a precise multi-hole direct injection system. A unique piston design improves combustion to boost power and lower emissions. Reduced friction liberates extra power, while a 4-2-1 exhaust layout lifts efficiency. The 4-cylinder engine delivers a sporty 115 kW of power and 206 Nm of torque, using as little as 6.7 litres of fuel every 100 km (combined).

SKYACTIV-BODY

We've applied the high standards of Takumi craftsmanship to the Mazda CX-3, like all our Mazda cars. The new-generation design and materials reduce mass while achieving high rigidity. Key joints are strengthened by advanced techniques requiring no heavy reinforcement. High and ultra-high tensile steel cuts weight and boosts strength. Despite being light, the Mazda CX-3 delivers world-class collision protection.

SKYACTIV-CHASSIS

The sense of 'oneness' between car and driver is amplified through careful optimisation throughout. Agility and refinement are ensured by a lightweight front strut and rear torsion beam suspension, employing firm bushings and precise geometry. Electric power-assisted steering delivers secure yet responsive handling and also saves fuel.

SKYACTIV-DRIVE AUTOMATIC TRANSMISSION

We want you to feel connected to the Mazda CX-3, so you can drive in a way that feels completely natural. The 6-speed automatic transmission combines the best aspects of conventional automatic, continuously variable and dual-clutch transmissions. It connects directly with the engine across a far wider range than other automatics for increased fuel economy and more direct power delivery.

SKYACTIV MANUAL TRANSMISSION

The Mazda CX-3 helps you to be the best driver you can be. The 6-speed SKYACTIV manual transmission delivers accurate, sports-car style shifting through simplified design and a precision mechanism. More compact and lighter than comparable transmissions, it significantly cuts friction to improve fuel economy.

SAFETY FEATURES

CONFIDENCE-INSPIRING SAFETY

The Mazda CX-3 comes with a suite of safety features that are primed for anything. Its light weight delivers sporty performance, yet its body is immensely strong. Multiple load paths divert crash energy from the occupant cell, helping to achieve world-class collision safety. Six SRS airbags are integrated, including front, side (front) and curtain (front and rear).

G-VECTURING CONTROL (GVC)

The 2.0 litre SKYACTIV engine introduces G-Vectoring Control (GVC), the first innovation from the SKYACTIV-VEHICLE DYNAMICS series technology. By finely controlling engine torque, based on the steering and acceleration of the driver, GVC improves both handling for the driver and ride quality for the passengers around corners.

LANE DEPARTURE WARNING (LDW)

The Lane Departure Warning system (LDW) detects line markings on the road surface and warns the driver of unintentional lane departures. This system is particularly effective in situations where the road is continuously straight and drivers have a tendency to not pay sufficient attention to the road.

Standard on Hikari models.

SMART CITY BRAKE SUPPORT (SCBS)

The Smart City Brake Support system (SCBS) is a safety feature that helps prevent or lessen low-speed impacts. The system monitors the vehicle in front to assess the possibility of a collision at forward speeds of 4 - 80 km/h. In an event that the system detects a high-risk impact, it then issues visual and audible warnings and primes the brakes for a faster response should the driver brake.

Standard on Hikari models.

DRIVER ATTENTION ALERT (DAA)

Driver Attention Alert (DAA) is designed to reduce accidents caused by inattentiveness due to driver fatigue. The system is activated at speeds above 65 km/h and begins to 'learn' the driver's habits, watching inputs and the vehicle's movements in the early stages before fatigue is a factor. Later, if the system detects changes in vehicle behaviour that suggests the driver may be losing concentration, it will suggest a rest stop by sounding a chime and displaying a warning in the Head-Up Display (HUD).

Standard on Hikari models.

BLIND SPOT MONITORING (BSM)

The Blind Spot Monitoring (BSM) uses radars mounted in the rear bumper to detect vehicles approaching from behind and in the adjacent lane; an audible alert is triggered in the event that a vehicle is detected in your vehicle's blind spot and assists the driver by scanning the external mirrors' blind spots. The radar is able to detect any unseen vehicles and through an LED icon, alert the driver to help avoid making hazardous lane changes.

Standard on Hikari models.

ADAPTIVE LED HEADLAMPS (ALH)

Individual control of several LEDs allows precise adjustment of the lighting pattern. The system automatically broadens visibility at low speeds, shapes the high beam to help avoid dazzling other drivers and raises beam height at highway speeds to extend vision area.

Standard on Hikari models.

HEAD-UP DISPLAY (HUD)

Mazda's Head-Up Display (HUD) shows important driving information like current speed, next turn directions from the integrated navigation and safety alerts. It is positioned directly in front of the driver, which means it feeds you all the information without you needing to take your eyes off the road. You can adjust the height at the display to match your eyeline.

Standard on Individual and Hikari models.
